- Widest range of PET/CT and SPECT/CT sources available
- Clinical MRI visibility available with our MMS10 source
- Only fiducial marker available with visibility in all 3 modalities
- Custom design available

Eckert & Ziegler
Isotope Products

There are many reasons why we're among the world's leading suppliers of radioactive sources for medical imaging: the broadest range of isotopes, in-house R&D, engineering, manufacturing for the best quality and flexibility, as well as the supply chain control for on-time delivery.

With sales and support in 60 countries and operating sites in the United States and Europe, we offer the local level of service that global customers demand, as well as the broad range of registrations you need including ISO, CE Mark / MDD, FDA, and DKD.
